OCCUPATIONAL THERAPY SCREENINGS AT TLC

APRIL 16, 2018 - APRIL 27, 2018

DOES YOUR CHILD EXPERIENCE DIFFICULTY WITH ANY OF THE FOLLOWING?

- Struggling with handwriting?
- Difficulty learning new motor tasks?
- Avoiding coloring, drawing or cutting?
- Clumsiness?
- Covering ears with loud noises?
- Always "on the go" or fidgety?
- Bothered by tags in clothing?
- Annoyed by messy hands and fingers?

Occupational Therapists are skilled in assessing how a child's sensory processing abilities, fine motor skills, visual motor skills, and gross motor skills impact performance and function in daily life including self-care, play and academics. Proficient skills in these areas are imperative for children to be successful in the classroom environment. The screens can also be used as a preventative measure to ensure that a child's development is on track and the child will have the foundation skills necessary to be available to learn.

Screenings are available for **all ages** of children and take 30 minutes.

CALL NOW TO SCHEDULE A FREE SCREENING: 301-424-5200
